

Agreement Reached At Ottawa Conference May Have Beneficial Effect On Hog Industry In Canada

Since the Ottawa Economic Conference ended, it appears to be already the reversal of the usual rule that the agreements reached there, Principal among the agreements are affecting livestock and animal products.

The principle adopted by the United Kingdom for the control of its imports is "limitation of imports." This system of limitation is being applied to all the important classes of meats—beef and mutton, lamb and pork, and certain classes of by-products.

In Canada, more has been said about the agreement as it affects bacon. However, it determines that the importation by Britain to limit the importation of all meats in the really big factor to grasp. It is this that gives the agreement by the United Kingdom to Canada of 200,000,000 pounds of bacon a meaning and significance.

From the standpoint of the Canadian livestock industry it is important that the importation of all meats in the really big factor to grasp. It is this that gives the agreement by the United Kingdom to Canada of 200,000,000 pounds of bacon a meaning and significance.

The agreements apply to certain classes of meats, but for some time ago, Canada has had restrictions of imports of other classes of meats. These are now being removed by the United Kingdom.

at present, the industries best suited to certain countries always survive. Canada is one of the countries that has the natural conditions for the survival of the hog industry. The policy decided by the Government of the United Kingdom is intended to favor the survival of the hog industry of Canada.

Timber Shortage In Washington and Oregon
U.S. Says Imports

Log shortages facing industries in Washington and Oregon as the result of the recent loss of a billion feet of Douglas fir by fire in the Columbia River Valley area will materially in the stabilizing of the lumber industry in the Pacific northwest in the event of leading Vancouver lumbermen.

In British Columbia forest fires have been burning since last summer and with the exception of the lumber which swept the Campbell River district, the rest of the forest has been wiped out.

It is anticipated that with the heavy loss of timber in the logging states there will be a demand for imported lumber, but it is hoped that the United Kingdom will be able to supply the requirements in the event of such a shortage.

The surge of the United Kingdom will be able to supply the requirements in the event of such a shortage. The surge of the United Kingdom will be able to supply the requirements in the event of such a shortage.

An Ugly Man's Club
Association In Perth, West Australia, Does Handsome Deeds

There has been no sign given that the Ugly Man's Association of Perth, West Australia, is going to change the name of the club, but the qualifications for membership which have always been simply the possession of ugliness have not, as it can be learned, been altered.

No doubt members go about full of a sort of personal pride in the possession of their ugliness, and the club is a place where they can express this in mutual admiration and respect.

The club is a place where they can express this in mutual admiration and respect. The club is a place where they can express this in mutual admiration and respect.

New National Park Planned
United States Rigily Enforcing Restriction

Two Sets On Vancouver Island Are Being Considered

Establishment of a new national park in British Columbia is being considered by the Canadian and provincial governments, and F. W. H. Murray, the federal park branch, has been on the spot recently facing the groundwork for such a project.

Gardner Mountain is favorably regarded as a site for the new park, although the park branch is said to be eager to establish a new level park to complete its trans-Canada park system. For the latter purpose a park on the west coast of Vancouver Island is being considered.

The only other national park on Vancouver Island is Strathcona, however, a mountainous and somewhat inaccessible area.

Colonel W. W. Foster, member of the Mount Logan expedition, of recent years, is one of the best known mountaineers in Canada, has been a reporter on the Gardner project and this has been met by the United States.

Canadian Posters For Britain
New Methods Whereby Posters May Be Readily Shipped

Methods whereby Canadian posters may be put in the United Kingdom have been under discussion for some time. Mr. H. Stevens, of the British Post Office, has been in the country to see the possibilities of the project.

Mr. Stevens was asked by Thomas (Cous. Springfield), in connection with a western survey dispatch to the United States, what the possibilities of the project were.

He was not in a position to enter into details of the transaction, the minister replied.

Tramped Homeless Wanderers
Forty-six students from Germany who recently left the war zone in the north of Germany, are now wandering the highways between Cologne and Krefeld, where they have been constructed during the World War.

Andros, one of the Bahamas Islands, has a lake which generates its own power for its electric light system.

Fruit Processed In Canada
Eighty-Eight Countries Doing Business In Western Province

There is a "market of Fruit and Vegetable Preparation" from the Ottawa of industry branch at Ottawa, and it is estimated that the four western provinces processing fruit and vegetable products are worth \$10,000,000 a year.

Distinctive Canadian Formula Is Now Used For Extraction Of Radium From Western Ores

How Cancer Begins
Everyone Should Know the Symptoms and Receive Early Treatment

Cancer never begins as cancer. Dr. Joseph C. Moore, director of the Cancer Research Institute, Baltimore, told the Ottawa Medical Association.

"It begins as a single spot," he said, "and the cancer cells of the spot are changed into cancer cells, which are not cancer cells."

Chemical irritation, injury or pre-existing tumors such as warts or moles and unhealed wounds are some of the sites in which cancer develops, the doctor continued.

He stressed it was important that everyone should know the symptoms, signs of little things that are not cancer but which may become cancer and the earliest stages of cancer are identical.

"On this fundamental advice rests the action of having an immediate examination after the first warning," he declared.

Dr. Bloodgood said his audience members suffering from early stages of cancer of the breast run risk that more than 25 per cent will die, while those who defer examination through ignorance run the risk of death in 50 per cent or less.

A semi-annual examination of women, he said, would permit the detection of spots in the cervix which are not cancer, but which may become cancer or the earliest stages of cancer. Radium treatment could then be used to destroy the cancerous tissue.

Under present conditions, he declared, most patients seeking examination for cancer of the cervix had the means to pay for the examination, but that there was no more than a 10 per cent chance of cure.

A Prosperous Town
Full-Time Job For Every Man In Cornish, B.C.

Which is the most prosperous town in Canada?

According to Thomas Uppill, Labor Minister for British Columbia, it is Cornish. In the town is a full-time job for every man, and although the mine employs only 200, there are 1,000 other jobs in the town.

The town, incidentally, is the only place in British Columbia where a dollar is paid for every man in the town, and has been so for many years.

Just a few miles from the town, at Fernie, B.C., one of the poorest towns, from the economic standpoint, according to Uppill, the town is unable to meet the one-third share of unemployment, relief, already it is far from being a success.

Mr. Uppill created a sensation at his last session of the legislature by proposing that the government should raise money by selling titles. Wealthy men would be asked to give up their titles in exchange for a provincial knighthood, he said.

U.S. Farm Population
Many Return To The Land As A Result Of Hard Times

Hard times have led many to a "back to the land" in the United States, statistics issued by the Department of Agriculture reveal. Present farm population of the country is estimated at 22,000,000, an increase of about 2,000,000 in three years.

Local Grain Prices.

WEDNESDAY, DEC. 7, 1932.

There have been for several years, special circumstances connected with the supply of wheat, which would make fairly low prices inevitable. But the general depression which now for three years has afflicted that world, is considered even more important as a depressant factor in grain. This year's world production, outside of Russia and China, is practically the same as last year, and now there can be estimated within a year—probably next year—another world production outside of Russia and China, which would make a normal flow of trade and hence a normal supply of wheat in this country, where prices have been kept very low in tariff. Furthermore, in the United States, in Russia, in Great Britain and in continental Europe, now depressed, and the whole review will enjoy special relief.

It is understood that a party has been invited to meet shareholders of the Company, while others interested, may require notice on any given day. The United Grain Growers Limited.
